

ADITI MUNDE

+91-9168578655 aditimunde2005@gmail.com github.com/Aditi-tech-del

PROFESSIONAL SUMMARY

Computer Science student with strong foundation in programming, data science, and artificial intelligence. Experienced in developing AI-powered applications using Python, C++, and modern ML frameworks. Demonstrated ability to build end-to-end solutions from data analysis to deployment. Seeking software engineering opportunities at top-tier technology companies to contribute to innovative products and scalable systems.

EDUCATION

Vishwakarma Institute of Information Technology

Bachelor of Technology in Computer Science and Engineering
CGPA: 8.5/10.0

Pune, Maharashtra

Expected 2027

Huzurpaga Girls High School and Junior College

Higher Secondary Certificate (HSC)
Percentage: 80.5%

Maharashtra

2021

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter, Exploratory Data Analysis (EDA)

AI/ML Technologies: Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, LangServe, Langsmith, Agentic AI

Databases: MySQL, SQLite

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, Machine Learning, Deep Learning, OS

AI Fundamentals: Tokenization, Embeddings, Transformer Architecture, Prompt Engineering, RAG

PROJECTS & INDUSTRIAL TRAINING

Back Office AI Router with RAG | Python, LangChain, Streamlit, FAISS, Groq LLM

2025

- Built an AI-powered document intelligence system capable of classifying, routing, and semantically querying enterprise documents including PDF, DOCX, and TXT files
- Implemented Retrieval-Augmented Generation (RAG) using HuggingFace embeddings and FAISS vector database for contextual question answering over uploaded documents
- Developed document-specific AI assistants enabling users to chat with individual documents using semantic retrieval and context-aware LLM responses
- Integrated automated document classification, confidence scoring, and intelligent department routing for back-office workflow automation using LangChain and Groq LLMs
- GitHub:** github.com/Aditi-tech-del/back-office-ai-router

Electrovent -Industrial Project- Anomaly detection for Predictive Maintenance in Motors | Python Scikit-learn

2025-2026

- Built the system collaboratively with a team of 4 as part of an industry-oriented college project
- Designed a chatbot for Flask-based REST API backend to interact with results after anomaly detection results
- Implemented machine learning models including Random Forest, K-Means, and Isolation Forest, achieving a model accuracy of 90%

AI Trip Planner | Python, Streamlit, FastAPI, Groq LLMs, LangGraph

2025

- Built a modular AI Trip Planner using Streamlit for the UI, FastAPI for the backend, Groq LLMs, and LangGraph-based agent workflows
- Integrated tools for weather forecasts, place search, currency conversion, expense calculation, and travel-plan generation
- Implemented secure API-key configuration with environment variables and modular service/tool architecture
- GitHub:** github.com/Aditi-tech-del/AI_Trip_Planner

ACHIEVEMENTS & CERTIFICATIONS

Academic Excellence: Maintained CGPA of 8.5+ throughout undergraduate studies

Technical Certifications: Introduction to Python, Oracle Certified Foundations Associate

Leadership: Documentation Team Member, College Coding Forum and Associate Documentation Head, Data Science Student's Association

ADDITIONAL INFORMATION

Soft Skills: Problem-solving, Team collaboration, Communication, Project management, Adaptability

Languages: English (Fluent), Hindi (Native), Marathi (Native)

Interests: AI research, Data visualization, Technology blogging
